NATIONAL WORKSHOP FOR ICT POLICY REVIEW, HILTON HOTEL, FROM 28TH – 29TH JULY 2008

The Regional ICT Support Programme (RICTSP), funded by the 9th EDF is assisting EAC Partner states to review existing or update National ICT policies aimed at harmonious development of the information industry within the region in all ICT sub-sectors, namely telecommunications (fixed and wireless), broadcasting/digital media, internet and data, IT and information management policy and postal services.

A Fact Finding Exercise on ICT Policy in the country was carried out in order to identify strengths and weaknesses with reference to the development objectives defined. The RICTSP also assisted in developing a draft Harmonization Framework for ICT policies for EAC Partner states.

Following the completion of the fact finding mission on ICT Policy and draft harmonization framework which commenced in February 2008 and ended in April 2008, the RICTSP is organizing a stakeholders' workshop on 28th – 29th July, 2008 to share the views and comments on the two documents. Your organization has been invited to send a representative to attend the workshop.

A handwritten signature in black ink, appearing to read 'Bitange Ndemo', written over a vertical line that extends from the signature down to the name below.

**BITANGE NDEMO, PhD, CBS
PERMANENT SECRETARY**
