Business Continuity Management {Introductory Level}

THE NAIROBI SAFARI CLUB
10th February, 2012

Working With You To Create And Sustain Exceptional Corporate Success

COMPETENCE ● PROFESSIONALISM ● INTEGRITY

1. OVERVIEW

Disasters are unpredictable; but they happen. Only businesses that are prepared to face disasters, in times of crisis, are likely to survive. This course assures continued business operations in the face of a disruption. BCM is essential for enterprise sustainability. Proactively managing risks through Business Continuity Planning (BCP) and Disaster Recovery Planning (DRP), combined with associated time-tested managment processes, assure sustainability. Establishing a BCM system ensures that your business remains operational in the most challenging times due to unexpected occurences, as it would ensure protection of your personnel, and preservation of your reputation and reliability while providing the ability to remain in business.

2. TARGET AUDIENCE

This course will therefore be of invaluable benefit to Executives and Managers responsible for:

   * Enterprise Risk Management,
   * Technology Planning Deployment & Management,
   * Human Resource Management,
   * Facilities Planning & Management.
   * ICT Operations Personnel responsible for BCP and DRP.
   * Officials concerned with Business Continuity & Crisis Management.
   * Project Managers,
   * Public Relations
   * Corporate Communications Managers.

3. OBJECTIVES

The main course objective is to expose participants to existing and emerging practices in BCM for purposes of raising resiliency.
The course will specifically:
- Examine the "why, what, when, how and who" aspects of BCM
- Establish the relevance of BCM and BCM practices in an enterprise

4. COURSE CONTENT

This is an introductory that will focus on:

   * BCM Concepts including Business Continuity,
   * Emergency Management,
   * Crisis Management, and
   * Business Recovery from a Resiliency Perspective.

Participants will learn how to identlfy and define problems, plan, respond and recover when disasters happen.
They will further learn how to establish BCM Systems in organisations based on best practices based on standards such as ISO27000 and BS 25999.

5. FACILITATION

This programme will be facilitated by qualified and experienced KIB Resource Instructors.
The lead instructor, Mr. Matunda Nyanchama (Ph.D, CISSP) has more than 15 years experience in Information Security, having held several senior positions in various industries, including IBM Global Services,
