

age.

Disasters are unpredictable! They happen! Remember WESTGATE? Only businesses that are prepared to face disasters are likely to survive.

4-Day Business Continuity Planning & Disaster Recovery Training February 3rd – 6th, 2014, Sun & Sand Hotel, Mombasa

Business continuity management (BCM) is about ensuring continued business operations in the face of a disaster. It is essential endurance. Proactively managing risks through business continuity planning (BCP) and disaster recovery planning (DRP), based time-tested management processes, assure sustainability. BCM ensures that your business will remain in operation the most challenging times, such as unexpected occurrences. It ensures protection of your personnel, continued essential business processes and preservation of your reputation.

This course offer BCM concepts including business continuity, emergency management, crisis management and business recovery. Participants will learn how to identify and define problems, plan, respond and recover from disasters. Attendees will further learn how to establish BCM systems in organizations based on global standards such as ISO 22301, ISO 31000 and ISO 27000.

Objectives

Expose participants to existing and emerging practices in BCM, specifically:

- Examine the "why, what, when, how and who" aspects of BCM
- Establish the relevance of BCM and BCM practices in an enterprise
- Develop practical steps towards BCM management systems in your enterprise
- Demonstrate how to plan, test and implement business continuity and disaster recovery
