

INFORMATION COMMUNICATION TECHNOLOGY ASSOCIATION OF KENYA

Improving Lives Through ICT

CERTIFIED CYBER SECURITY ASSOCIATE (CCSA) TRAINING (AUGUST 25TH -29TH 2014)

Having recognized the phenomenal challenge posed to Kenyan digital systems by emerging cyber security threats, the ICT Association of Kenya (ICTAK) has designed a comprehensive system security program for ICT professionals to enable them steer organizations towards excellence in ICT security.

This cyber security program is the first of its kind in Africa and is based on the necessity to reinforce Kenya's capacity as a regional hotbed for ICT solutions. ICTAK is pleased to announce that the third edition of CCSA training will run from 25th to 29th of August 2014 at the Safari Park Hotel, Nairobi. Modules to be covered include:

- Appraising the Security of Systems
- ICT Governance and Security Awareness (ISO 27001)
- Holistic Information Security Audit
- Network Security
- Server Security
- Wireless Security
- Ethical Hacking and Penetration Testing
- Cryptography
- Intrusion Detection Systems, Firewalls and Honeypots
- Social Engineering Designs
- Security for Mobile Technology
- Digital Forensics
- Cyber Law, Policy and Ethics
- Disaster Recovery And Business Continuity
- Practical Sessions with Software Toolkits for Securing Systems

Successful participants will be awarded the Certified Cyber Security Associate (CCSA) certification. Detailed description of the modules covered in the training is available at www.ictak.or.ke

Training Registration Fee:

ICTAK Members: Kshs. 75,000/= or US\$875

Non Members- Kshs. 85,000/= or US\$ 990

This payment is inclusive of 5 days expert guided tutorials, course materials, certification, refreshments and meals.
